AI-POWERED FRAUD DETECTION SOLUTIONS

01 Bypass Fraud

Artificial Intelligence enabled solution to detect SIM box activity faster and provide near real-time notifications with the enhanced analysis arena. The solution combines the best of traditional fraud management with modern machine learning models, which continuously mine deep behavioral patterns.

02 IRSF Detection

The solution has AI-powered fraud detection models to detect IRSF frauds with a dashboard for real-time monitoring, which will allow taking actions instantly. The intelligent database automatically updates the hotlist by aggregating the newly identified global number ranges and premium number ranges from different sources.

03 Subscription Fraud Detection

Artificial Intelligence enabled Subscription fraud models are tailored to score the customers at the time of onboarding. The solution assesses the risk of the new subscription and helps in protecting the losses incurred on bundled handsets.

04 Signaling Security

Signaling security solution is designed to address the traditional and new-age risks across various services. The solution employs a proactive approach using a combination of signatures, heuristics and machine learning techniques to combat all types of threats.

BENEFITS OF AI-POWERED FRAUD DETECTION

Increased fraud coverage across all your services

Reduced fraud run-time with real-time blocking capabilities

68% of the Bypass frauds detected within 5 minutes of usage

150% additional IRSF frauds averted

Low total cost ownership (TCO)

Improved profitability with a wider range of digital services
